

What is "Dyrlæger & Ko"

Dyrlæger & Ko is an association of 20 vet practices distributed all over Denmark. In these practices about 70 cattle vets work with health advice, primarily in dairy herds. Dyrlæger & Ko vets service more than 1000 dairy herds, totalling above 25% of all danish dairy cattle, and we expect that the association will service at least 1/3 of all dairy cattle in Denmark during 2011.

Dyrlæger & Ko is a professional advisor and collaborator for the farmer. Our focus is to help the farmer to optimize the link between health, production and reproduction. We do our work systematically and base our advice and treatment plans on a documented and professional approach.

The network assures the best working conditions and development possibilities for cattle vets, partly because of the exchange of knowledge and a close daily collaboration between the practices.

A Practice within the Dyrlæger & Ko network is an attractive workplace because the focus is on professionalism and development. Among other things, the assistant course assures that you will get one of the best startup periods the industry can offer. This is continued with miscellaneous coursework you can do, in Denmark and abroad.

Short Resumé

Jens Stege Philipsen,

Cand.Med.Vet from KVL (what LIFE was called back in the day) in january 1980

Specialized in Cattle in 1992

Except from a short period in the '80s I have always worked exclusively with cattle.

Since 1990 I have been a participant in different projects concerning developing models for offering health advice to dairy herds, with a focus on systematically obtaining and using data in the hunt for "The Local Truth".

Our Practice is in the area of Silkeborg, Kjellerup, Ikast, Hammerum og Herning. We are 5 cattle vets with an office in Bording, along with 3 small animal vets at our clinic in Skægkær.
